

CINTIA SCHUTT

PROFESSIONAL SUMMARY

Frontend-focused Software Developer with 5+ years of experience delivering scalable, accessible SaaS applications using Angular, TypeScript, RxJS, and NgRx. Adept at building modular UI components, optimizing performance, and working closely with cross-functional teams in Agile environments.

Experienced with CI/CD (GitHub Actions), secure authentication systems (OAuth, Okta, Azure AD B2C), and cloud platforms (Azure, Docker, Kubernetes). Continuously expanding backend and DevOps knowledge, with a strong interest in building reliable, user-centered software across the stack.

TECHNICAL SKILLS

- **Frontend:** Angular, JavaScript, TypeScript, HTML, CSS, RxJS, NgRx, Angular Material
- **Backend & APIs:** RESTful APIs, OAuth, Java (basic)
- **Authentication:** Azure AD B2C, Okta
- **Database:** PostgreSQL
- **Cloud & DevOps:** Azure, Docker, Kubernetes (AKS), GitHub Actions
- **Testing & Tools:** Jest, Unit Testing, Git, JIRA, Agile/Scrum

WORK HISTORY

Software Developer

QHR Technologies · Apr 2019 – Present · Calgary, AB

- Built and maintained production-scale SaaS applications using Angular, TypeScript, RxJS, and NgRx, supporting Medeo Health's 4M+ user base.
- Led migration to an Nx monorepo architecture, improving code modularity, build performance, and team efficiency across services.
- Developed WCAG-compliant UI components and dashboards with Angular Material, improving accessibility and user experience.
- Integrated RESTful APIs and OAuth-based authentication to support secure, dynamic data flows across distributed services.
- Delivered scalable features including pagination, reusable reactive forms, and performance-optimized filtering for complex healthcare workflows.
- Collaborated within Agile cross-functional teams of designers, backend engineers, and product managers to ship user-centered features.
- Contributed to CI/CD pipeline improvements using GitHub Actions and Docker, and supported adoption of AKS (Azure Kubernetes Service).
- Conducted peer code reviews, resolved frontend defects, and modernized legacy components to align with Angular best practices.

Customer Service Representative

Banco do Brasil - Financial Institution · Apr 2012 – Jul 2016 · Brazil

- Delivered personalized financial solutions, guiding clients through account management, product offerings, and support.
- Built strong client relationships based on trust and clarity, driving user satisfaction and retention.
- Developed problem-solving and analytical skills by handling diverse financial inquiries and evaluating loan and credit conditions through internal systems.
- Gained deep insight into end-user behavior and needs, which now informs a user-centered approach in software development.

Inside Sales Representative

Dell Computers · Feb 2010 – Nov 2011 · Brazil

- Recognized as a “Top Performer in Customer Experience” for consistently exceeding client expectations.
- Leveraged product knowledge and client insights to drive a 25% revenue increase.
- Consistently exceeded monthly quotas through strategic communication and data-driven sales approaches.
- Strengthened ability to understand client pain points—skills now applied to building intuitive and valuable digital experiences.

EDUCATION

Certificate in Computer Systems – Software Development

British Columbia Institute of Technology (BCIT) · Burnaby, BC · 2017 - 2019

- Graduated with Distinction | Dean’s Award
- Focused on software development, cloud computing, and Agile methodologies
