CINTIA SCHUTT

PROFESSIONAL SUMMARY

Software developer with 5+ years of enterprise IT experience building and supporting secure SaaS applications used by millions of users. Hands-on experience integrating OAuth 2.0 and OpenID Connect authentication, designing secure REST APIs, investigating production issues, and working with sensitive healthcare information in regulated environments. Brings a client-focused background in financial services, strong documentation and cross-functional communication skills, and a focused transition into identity and access management.

TECHNICAL SKILLS

- **Identity, Security & Cloud**: OAuth 2.0, OpenID Connect (OIDC), Authentication, Secure API Design, Privacy, Regulatory Compliance, Azure, Docker, Kubernetes (AKS), GitHub Actions, CI/CD, Incident Investigation, Documentation
- **Technical**: Java, TypeScript, JavaScript, Go, Spring Boot, REST APIs, Microservices, PostgreSQL, Angular, RxJS, NgRx
- **Engineering**: Agile, Cross-functional Collaboration, Production Support, Debugging, Code Reviews, Automated Testing, System Design, Stakeholder Communication

WORK HISTORY

Software Developer

QHR Technologies · Apr 2019 – Present · Calgary, AB

- Developed, tested, and maintained enterprise SaaS applications serving millions of users, delivering scalable features from design through deployment.
- Built applications that manage sensitive healthcare information, applying strong security, privacy, reliability, and regulatory-compliance practices.
- Designed and integrated REST APIs that support secure authentication and reliable communication between distributed backend systems.
- Worked with OAuth 2.0 and OpenID Connect (OIDC) authentication standards in enterprise application development.
- Investigated and resolved complex production issues through structured troubleshooting, debugging, testing, and collaboration with cross-functional teams.
- Contributed to secure, reliable software releases through peer code reviews, automated testing, quality practices, and technical documentation.
- Supported cloud-native delivery workflows using GitHub Actions, Docker, and Azure Kubernetes Service (AKS), contributing to CI/CD automation and release processes.
- Participated in sprint planning, estimation, and technical design discussions in an Agile environment.
- Translated business requirements into technical solutions and communicated technical considerations clearly with team members and stakeholders.
- Contribute to documentation, peer code reviews, technical discussions, sprint planning, and cross-functional problem solving.

Customer Service Representative
Banco do Brasil - Financial Institution · Apr 2012 – Jul 2016 · Brazil

- Supported clients and business operations within one of Brazil's largest financial institutions, operating in a highly regulated environment.
- Built strong client relationships based on trust and clarity, driving user satisfaction and retention.
- Developed problem-solving and analytical skills by handling diverse financial inquiries and evaluating loan and credit conditions through internal systems.
- Gained deep insight into end-user behavior and needs, which now informs a user-centered approach in software development.

Inside Sales Representative
Dell Computers · Feb 2010 – Nov 2011 · Brazil

- Recognized as a "Top Performer in Customer Experience" for consistently exceeding client expectations.
- Leveraged product knowledge and client insights to drive a 25% revenue increase.
- Consistently exceeded monthly quotas through strategic communication and data-driven sales approaches.
- Strengthened ability to understand client pain points—skills now applied to building intuitive and valuable digital experiences.

EDUCATION

Certificate in Computer Systems – Software Development
British Columbia Institute of Technology (BCIT) · Burnaby, BC · 2017 - 2019

- Graduated with Distinction | Dean's Award
- Focused on software development, cloud computing, and Agile methodologies
